citysense •　The vision

Pilot in development

BATUMI FIRST · CONNECTED CITIES

Discover a city with context.

A more informed way to explore Batumi. Your needs, defensible alternatives, and the evidence behind your choice.

See how it will work ↗

CONCEPT PREVIEW · NON-FUNCTIONAL

Example request

An outdoor activity.
Step-free access required.

NONFUNCTIONAL MAP PLACEHOLDER

Spatial selection goes here.

No Batumi geography or provider tiles.

Illustrative comparison · not live results

Alternative A · example only

Access unknown. Excluded until required facts are verified.

Alternative B · evidence not populated. No eligible option asserted.

Illustrative layout. No live search, routes or availability.

01 / THE PROPOSED JOURNEY

Less guesswork.
More context.

01 Tell us what matters.

A need and essential constraints, not just a category.

02 Compare with evidence.

Up to five defensible alternatives, or fewer. Missing required facts stay unresolved.

03 Choose with context.

Inspect the map, sources and unknowns. Understand which next actions are actually supported.

02 / WHAT EXISTS, WHAT COMES NEXT

Existing foundation

Internal research and information components. They do not yet form a connected tourist experience.

Pilot being developed

QR/mobile discovery, constraints, comparison, map evidence and informed selection.

Long-term vision

Governed services and authorized AI-agent interfaces. Separately approved; not live.

03 / STARTING IN BATUMI

Local discovery.
A considered first step.

Tours

Planned inventory

Paid attractions

Planned inventory

Sports courts

Planned inventory

Later possibilities: private drivers, transfers and connectivity. No offers or integrations are active.

04 / LONG-TERM PLATFORM VISION

From city discovery to city intelligence.

People, places, local services and authorized AI agents — connected through evidence and governed interfaces.

Source-governed evidence

Contextual need & selection

Authorized service / agent interfaces

FUTURE · NOT AN OPERATING NETWORK

05 / POTENTIAL PARTNERS

Build local trust, one conversation at a time.

Exploring partnerships with accommodation hosts and local service providers. Accommodation QR pilot proposed; placement permissions pending.

Enquiry channel awaiting verification

Future option: authorized affiliate links. None active in this concept. Disclosure and commercial policy require separate review.
