PILOT IN DEVELOPMENT / WEBSITE CONCEPT

How a city decision takes shape.

Developing context-aware city intelligence, beginning in Batumi.

Illustrative sequence · not a functioning product

Batumi · December 2023 · Alexabsent / CC0 1.0 · cropped

01

The visitor need

An outdoor afternoon in Batumi.

Representative input, not a live search.

02

The essential constraint

Step-free access is essential.

An unknown required fact cannot pass.

03

The evidence boundary

Access evidence missing → hold.

Source / age / usage rights / unknowns. No current place evidence connected.

04

Comparison, when defensible

Up to five eligible alternatives, or fewer.

A / B are conceptual slots only. No eligible option asserted here.

05

An action with permission

Permitted contact → partner response.

Future pathway. Contact channel pending; a request is not confirmation.

06 / FUTURE AUTHORIZED AGENT ACCESS

Governed evidence and explicit permission. No public API or MCP access yet.

THE REASONING, REVEALED

Context changes what counts as an option.

02 The essential constraint

Step-free access is essential.

An unknown required fact cannot pass.

03 The evidence boundary

Access evidence missing → hold.

Source / age / usage rights / unknowns. No current place evidence connected.

04 Comparison, when defensible

Up to five eligible alternatives, or fewer.

A / B are conceptual slots only. No eligible option asserted here.

05 An action with permission

Permitted contact → partner response.

Future pathway. Contact channel pending; a request is not confirmation.

WHERE THE WORK STANDS

Existing internal foundation

Research, evidence and private information components.

First tourist use case

Batumi discovery and informed selection — in development.

Future infrastructure

Governed services and authorized agent interfaces — not publicly available.

LONG-TERM VISION / SEPARATELY GATED

One governed foundation. More than one interface.

People ↔ places ↔ local services ↔ authorized AI agents

Source-governed evidence

Constraints & human choice

Permitted services / agent access

FUTURE VISION · NOT AN OPERATING CITY NETWORK

A SMALL WEBSITE. A SPECIFIC INVITATION.

Help shape the first Batumi use case.

Service providers and distribution partners can explore bounded participation. Terms, placement permissions and contact channels remain to be agreed.

Explore partner paths ↗

citysense / developing city intelligence

LANDING-WEB concept only. PRODUCT-APP design has separate Founder gates.

Contact / publisher / jurisdiction: awaiting Founder confirmation. Privacy / Terms / Affiliate Disclosure: review pending; no working destinations.

No affiliate links active. Any future commission relationship requires authorization and disclosure; commercial priority remains inactive.
