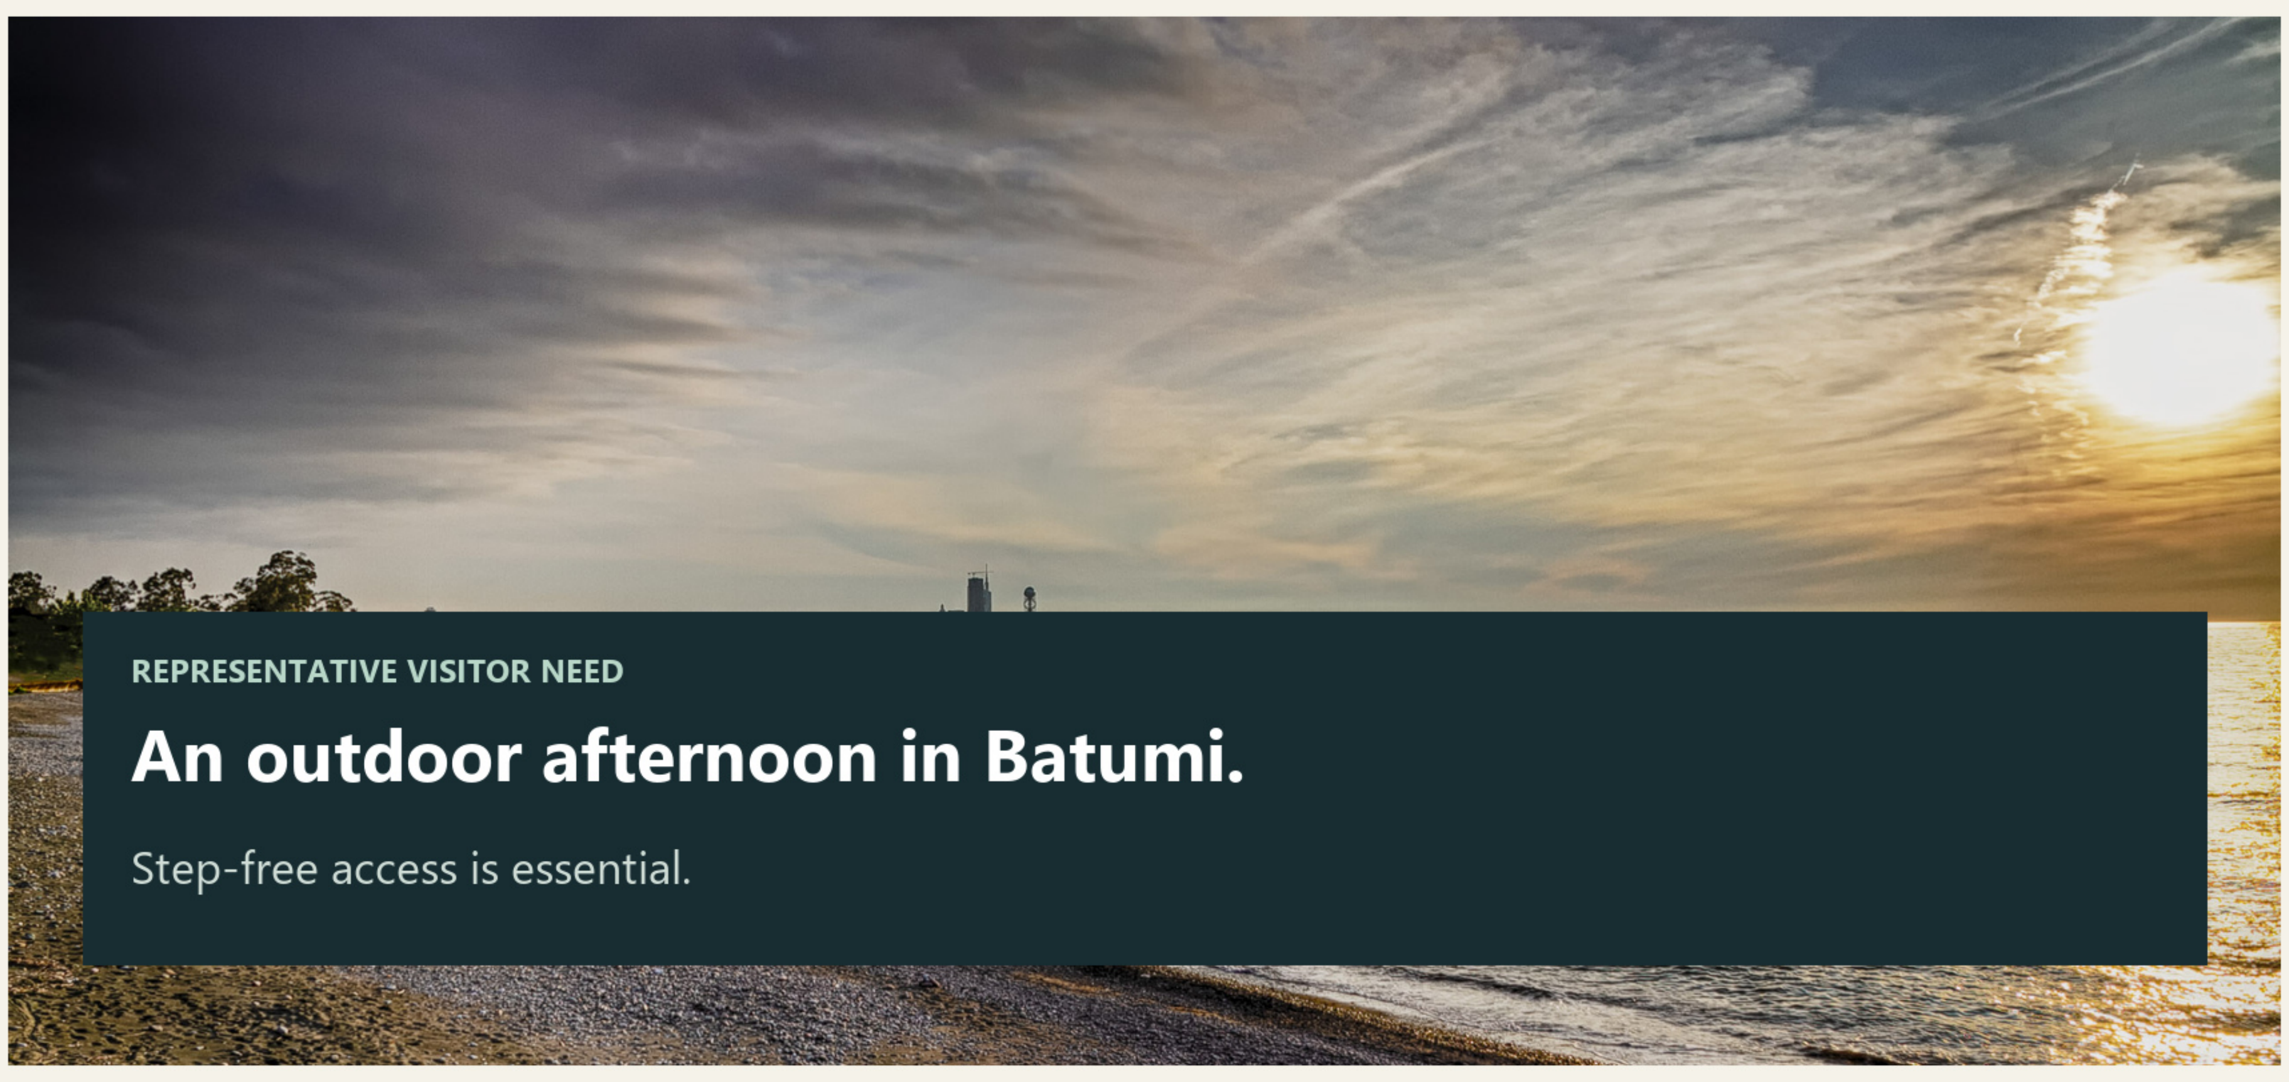
PILOT IN DEVELOPMENT / WEBSITE CONCEPT

A city is more than a list of places.

Developing context-aware city intelligence, beginning with tourist decisions in Batumi.



REPRESENTATIVE VISITOR NEED

An outdoor afternoon in Batumi.

Step-free access is essential.

Batumi coast · 2016 · Lex Kravetski / CC BY 2.0 · cropped

01 / THE FACT THAT MATTERS

Step-free access is essential.

Access evidence missing → hold.

No defensible option yet. Clarify or wait for evidence.

Evidence must support the choice. A photograph supplies context, not access facts.

Illustrative sequence · not a functioning product

Explore the concept ↗

Evidence → conditional comparison → permitted action → future authorized agents

THE REASONING, REVEALED

Context changes what counts as an option.

02 The essential constraint

Step-free access is essential.

An unknown required fact cannot pass.

03 The evidence boundary

Access evidence missing → hold.

Source / age / usage rights / unknowns. No current place evidence connected.

04 Comparison, when defensible

Up to five eligible alternatives, or fewer.

A / B are conceptual slots only. No eligible option asserted here.

05 An action with permission

Permitted contact → partner response.

Future pathway. Contact channel pending; a request is not confirmation.

WHERE THE WORK STANDS

Existing internal foundation

Research, evidence and private information components.

First tourist use case

Batumi discovery and informed selection — in development.

Future infrastructure

Governed services and authorized agent interfaces — not publicly available.

LONG-TERM VISION / SEPARATELY GATED

One governed foundation. More than one interface.

People ↔ places ↔ local services ↔ authorized AI agents

- Source-governed evidence
- Constraints & human choice
- Permitted services / agent access

FUTURE VISION · NOT AN OPERATING CITY NETWORK

A SMALL WEBSITE. A SPECIFIC INVITATION.

Help shape the first Batumi use case.

Service providers and distribution partners can explore bounded participation. Terms, placement permissions and contact channels remain to be agreed.
